Assessor: Keith Tuckerman, NDipMgt, EngTech, MIFireE

Engineering
Technician

Date of inspection 06 August 2026

This review was carried out by Keith Tuckerman, NDipMgt, EngTech, MIFireE, IFE Registered Risk Assessor, on the above date. The object of the review was to ensure that the Fire Risk Assessment carried out in December 2020 was still valid.

There have not been any material changes to the buildings which are of simple construction. Therefore, a full fire risk assessment is not required; a simple review is deemed acceptable.

Since the last review, a compostable toilet block has been added to the field which does not affect the fire risk assessment.

Items noted were: -

No further information was given with regards to fires in the pavilion that was raised last year.

The pavilion was inspected and there was not any significant fire damage observed.

The recommendation re solar powered CCTV is still suggested for continued surveillance and the safety of users of the facilities.

A copy of the Electrical Installation Condition Report was provided; the electrical installation will require a re-test in May 2027.

There were no further issues relating to the fire risk assessment that required attention.

Signed: *Keith Tuckerman* Date: 9 August 2026
